

Exam 3 Preparation

Topics for this exam:

- Second-Order Linear Circuits
- RLC circuits with and without Op-Amps
- Higher-Order circuits: combination of 1st and 2nd order
- Sinusoids and Linear circuits
- Master Unit 1, 2 concepts (1st order circuits, RC and LR circuits, Op-Amp Circuits , Laplace Transform solutions of linear circuits)

The goal is that you learn the material.

Exam will be Lockdown / Honorlock for proctoring the exam

One sheet of notes + your sheet of notes from the first exam.

No other tables, etc, will be allowed.

There will be no discussion about the format of the exam

Don't ask the number or types of questions. I won't answer anything.

At this point, you should have a better sense of the questions I might ask

From the Syllabus: *Expect the unexpected*
