

Exam 2 Preparation

Topics for this exam:

- RC and LR circuits
- Op-Amp Circuits
- Laplace Transform solutions of linear circuits
- Using Laplace transform representations of capacitors and inductors
- Introduction to Frequency Response
- Master Unit 1 concepts (V Dividers, One-Ports, Superposition, Dependent Sources, etc.)

The goal is that you learn the material.

One sheet of notes + your sheet of notes from the first exam.
No other tables, etc, will be allowed.

There will be no discussion about the format of the exam

Don't ask the number or types of questions. I won't answer anything.

From the Syllabus: *Expect the unexpected*
